Our Feasibility Studies serve the requirements of our clients in the Cement, Lime, Coal, Frac Sand (Proppants), and other non-metallic mineral industries or those of the Financial Institutions financing projects for these industries.

Our Services:

- Geological Evaluation
 - Surface reconnaissance
 - Core drilling program
 - Sample Testing
 - Reserve Estimates
- Market Studies
- Conceptual Engineering
- Project Economics
 - CapEx
 - OpEx
 - Economic Analysis
- Project Schedule
- Logistics & Operations
- Environmental & Regulatory Compliance
- Social & Political Risk Assessment

Benefits:

- The Project's potential for success will be defined by a thorough study of its viability for the long term.
- A well-prepared Feasibility Study sets the groundwork for a successful project.
- When seeking financing for the Project, a Bankable Feasibility Study prepared by highly experienced professionals is a guarantee for all the stakeholders.
