We focus on a comprehensive approach to satisfy our clients specific requirements with creative, cost-effective solutions.

## Our Services:

- **Historic Evaluation:** Analyze past data to identify performance and breakdown trends
- **Plant optimization:** Evaluate the plant operation to identify bottlenecks and solutions
- **Quality Assurance:** Examine Raw material chemistry and product quality and recommend improvements
- **Bench marking:** Compare operating KPIs with best International standards and establish plant-specific bench marks
- **Process Assessment:** Validate process parameters with process simulations and mass/energy balance
- **Energy optimization:** Target power and heat consumption and recommend steps to lower the energy consumption
- **Operational strategy:** Establish operational strategy for minimizing energy consumption, lowering outages and bottlenecks, increasing production and ensuring quality
- **Implementation assistance:** Help plants to plan and implement recommendations in the most effective way

## Benefits:

- Lower operating costs
- Higher production
- Better run factor
- Consistent product quality
- Lower risks of accidents
- Better workforce morale
