

Reference List – Industrial Sands Selected Projects

Some of our most relevant projects have been selected and are presented in the following slides.

For more information please contact us at
info@peccg.com

Turnkey Processing Solutions

Electrical and automation for a new primary and secondary aggregate crushing system for a Greenfield Frac Sand Plant and rail load out system.

Premier Silica, East Voca, Texas

Frac Sand mining and plant design for a large Greenfield Proppant Sand operations which included a quarry, primary and secondary crushing, storage, wet process, drying and truck load out systems. The Scope included the development through implementation of the facility.

Premier Silica, South Voca, Texas

Development of concepts and engineering for a new frac sand processing facility.

Taurus Funds, B.C., Canada

Technical Due Diligence of a new frac sand processing and handling facility.

Southern Sand and Stone, Florida

Mining operations of sand and lime rock including excavation sites producing 2.5 MM tons per year of sand.

Ottawa Silica Company

Operations for a large silica sand mining and processing facility with wet processing, fluid bed driers, sizing, grinding and packaging facilities for the supply of sand/kaolin clay to the oil/gas industry.

U.S. Silica Co., Missouri and Illinois

Engineering and mining of the company's largest silica sand operation and a satellite operation processing products for fracking, foundries, glass manufacturing and a variety of consumer products

Vulcan Construction Materials

Optimization of limestone and sand processes, technical support and improvement programs.
